Web interface design
Irene Vinent Mercadal

On my website, elements like the logo and icons feature an animation that causes them to grow in size when the user hovers the mouse pointer over them or interacts in some way.
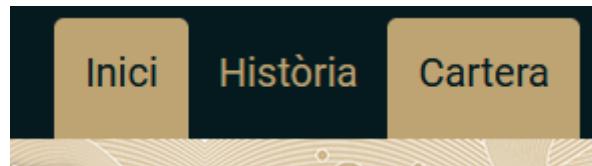

```css
.header-logo img {
  width: 50px;
  transition: all 100ms;
}

.header-logo img:hover {
  transform: scale(1.03);
}
```

On my website, there is a feature that highlights the current section or page the user is on.

```css
.nav-desktop > div > a {
  color: #BFA473;
  font-family: "Roboto", sans-serif;
  font-style: normal;
  font-size: 20px;
  border-top-left-radius: 5px;
  border-top-right-radius: 5px;
  text-decoration: none;
  padding: 15px 15px 21px;

  background: linear-gradient(0deg, #BFA473 50%, transparent 50%);
  background-size: 200% 200%;
  background-position: 100% 0%;
  transition: background-position 0.3s ease, color 0.5s ease;
  cursor: pointer;
}

.home > a:nth-child(1){
  background-color: #BFA473;
  color: #041A1F;
}

.nav-desktop > div > a:hover {
  background-position: 100% 100%;
  color: #041A1F;
}
```

On my website, there is a marker that reacts to the mouse pointer. When the user hovers over it, an animation is triggered, which may include color changes, movement, or visual effects.

```css
.home > a:nth-child(1){
  background-color: #BFA473;
  color: #041A1F;
}
```

On my website, when the mouse pointer hovers over an image, a shadow appears around it.

Ufe Garcia

```css
main > div:hover {
  filter: drop-shadow(0px 0px 5px #BFA473);
}
```

On my website, when the mouse pointer hovers over an input field, a lighting effect is activated.

Contrasenya

```
main > form > input:focus {
  outline: none;
  border: 2px solid ☐#DED1B7;
  box-shadow: 0px 0px 10px 0px ☐#BFA473;
}
```

On my website, when the mouse pointer hovers over a button, a lighting effect is activated.

Enviar

```
main > form > button:hover {
  border: 2px solid ☐#DED1B7;
  box-shadow: 0px 0px 10px 0px ☐#BFA473;
}
```

```
main > form > button:focus {
  outline: none;
  border: 2px solid ☐#DED1B7;
  box-shadow: 0px 0px 10px 0px ☐#BFA473;
}
```
